

## CALL FOR APPLICATIONS

### 2018 and 2019 Mäler Scholarship in Environmental Economics

Beijer Institute of Ecological Economics

The Beijer Institute of Ecological Economics ([www.beijer.kva.se](http://www.beijer.kva.se)) is pleased to announce a new round of the Mäler Scholar competition. The institute created the Mäler Scholarship in 2009, in honor of Professor Karl-Göran Mäler's long-standing contributions to environmental economics around the world. The scholarship allows researchers to spend up to 6 months at the institute developing new projects in collaboration with Beijer researchers. The institute is based at the Royal Swedish Academy of Sciences in Stockholm, Sweden and has a small staff of researchers who work on a variety of ecological-economics issues. The research focus of the applicant during the stay should relate closely to at least one of the [Beijer Institute's research programs](#).

The Beijer Institute's major objectives are to carry out research and stimulate cooperation to promote a deeper understanding of the interplay between ecological systems and social and economic development. The overall perspective is that humanity is embedded in the biosphere and shapes it from local to global scales, from the past to the future. At the same time humanity fundamentally depends on the capacity of the biosphere to sustain development.

We welcome candidates who can collaborate on research relevant to at least one of the Institute's in-house researchers and that can be applied to their home country. Methods and topics of interest include for example: quasi experimental research designs to study causal impacts of policies or economic activities on the environment; and experimental approaches to study human behaviour in relation to environmental change or use of natural resources.

The scholarship covers travel costs to and from Stockholm and provides a monthly allowance for lodging and meals. It is intended for early-career researchers in environmental economics from developing regions of the world who already have a PhD or are currently enrolled in a PhD program and will finish within 1-2 years. Preference is given to researchers affiliated with four regional environmental economics networks—CEEPA, EEPSEA, LACEEP, and SANDEE—and the EfD centers. Others are welcome to apply. [Read here](#) about former Mäler Scholars.

The institute is now accepting applications from researchers who are interested in spending up to 6 months at the institute in 2018 or 2019 during the periods January–June or August – December. **Applicants should e-mail a document containing the following information to Christina Leijonhufvud (Beijer administrator: [chris@beijer.kva.se](mailto:chris@beijer.kva.se)) by December 13, 2017:**

1. *Part 1 (maximum 1 page)*—A description of the research the applicant would like to conduct while at Beijer, including the names of Beijer researchers the applicant would like to interact with and a discussion of how the time spent at Beijer is expected to contribute to the applicant’s professional development. Applicants can learn more about Beijer researchers and their current projects [here](#).
2. *Part 2 (maximum 5 pages)*—An up-to-date CV that provides information on the applicant’s education (including short courses), positions held, publications, grants, and professional activities, including any prior activities related to the Beijer Institute or to CEEPA, EEPSEA, LACEEP, SANDEE, or the EfD centers.
3. *Part 3 (maximum 1 page)*—A proposed schedule showing the approximate dates when the applicant would like to be in residence at Beijer. The residency must be for a minimum of 2 months and a maximum of 6 months, with longer visits encouraged. It can be divided into two separate visits. The time-span when we can accept scholars at the Institute is January – June, and August – December. It is possible to apply for both years.
4. *Part 4 (maximum 1 page)* – An overview including the following information: Name, gender, country of origin, current affiliation, year of receiving PhD (or expected year), title of dissertation and which network you have connections with (if any).

**Please note that this material should be included in a single document, not four separate ones. Applications must be from individuals.**
